About Company

Afri iTech

Afri iTech is a South African IT solutions company committed to transforming the digital landscape across Africa. Founded by a seasoned software engineer with over a decade of experience in building billing and collections systems, Afri iTech delivers scalable, cloud-based software and managed IT services to organisations across multiple sectors.

We specialise in developing custom Software-as-a-Service (SaaS) platforms, enterprise support solutions, and sector-specific digital tools for churches, NGOs, and businesses. Our growing portfolio spans systems development, managed IT support, cloud hosting, ERP/CRM integration, and digital marketing – making us a full-stack technology partner for digitally driven transformation.

Market Position

Afri iTech operates in one of the world's fastest-growing IT markets. The South African IT services sector reached R104.9 billion in 2024 and is projected to grow to R182 billion by 2028, representing a compound annual growth rate of 14.8% – significantly exceeding global averages. This growth is driven by enterprise digital transformation, cloud adoption, and the emergence of AI and automation technologies.

We have strategically positioned ourselves to serve underserved market segments where genuine need meets limited competition. Our focus on faith-based organisations, NGOs, educational institutions, and small-to-medium enterprises allows us to deliver specialised solutions that larger vendors overlook. With over 75% of South African households having internet access and 97% mobile connectivity, the digital infrastructure is in place for widespread technology adoption across all sectors.

Industry Experience

Founder's Legacy

The founder of Afri iTech brings over 10 years of hands-on experience designing and developing billing and collection platforms, including the well-regarded Advocate Billing Software – a trusted system used in legal and administrative sectors. His leadership in technical architecture and user-centred development continues to shape Afri iTech's agile and outcome-focused approach.

This deep expertise in financial systems and enterprise software development underpins our ability to deliver mission-critical applications that organisations depend on daily. Our technical competencies span modern web and mobile development frameworks, cloud infrastructure (AWS, Azure, Microsoft 365), database design, ERP/CRM implementation, network configuration, and comprehensive IT support.

Industries We Serve

We have developed deep expertise in sectors that require specialised technology solutions:

SECTOR	OUR SOLUTIONS
Faith-Based Organisations	Multi-branch church management, member databases, donation tracking, online giving integration, event coordination, and volunteer management systems.
NGOs & Non-Profits	Donor management, programme tracking, beneficiary databases, compliance reporting, disability data management, and grant administration platforms.
Educational Institutions	Bursary management systems, student information platforms, fund administration, application processing, and compliance reporting tools.
SMEs & Enterprises	ERP/CRM implementation, billing and invoicing systems, business intelligence, cloud migration, and managed IT support services.
Legal & Professional Services	Billing and collections software, practice management systems, document management, and client relationship tools.

Key Solutions and Projects

Our portfolio demonstrates our capability to deliver enterprise-grade solutions across diverse sectors. Each project reflects our commitment to building systems that are reliable, scalable, and tailored to the unique requirements of our clients.

Bursary Management System (BMS)

Developed for NPS Management Solutions, this cloud-based platform streamlines bursary applications, student tracking, and reporting. The system provides comprehensive fund administration capabilities for educational institutions and bursary funders, handling the complete lifecycle from application through to disbursement and compliance reporting.

Disability Management SaaS for KZN Blind Society

A custom-built disability data system supporting the needs of visually impaired individuals across KwaZulu-Natal. This platform enables case management, service tracking, and comprehensive reporting. Afri iTech also provides full IT support and system maintenance to both the KZN Blind Society and NPS Management Solutions, demonstrating our capability as a long-term technology partner.

Afri iTech Business Suite

A modular business billing and management platform that offers invoicing, customer management, reporting, and more – ideal for small to mid-sized enterprises seeking affordable yet powerful business tools. Built on our decade of experience in billing systems, this platform brings enterprise-grade functionality to businesses that previously could not afford such solutions.

Multi-Branch Church Management System

A scalable, multi-site platform for churches to manage memberships, donations, events, and internal communication across various branches. Designed for large congregations requiring centralised administration with distributed access. The global church management software market is projected to reach \$415 million by 2032, and our solution is positioned to serve the growing African market.

Digital Business Cards Platform

Enables professionals and businesses to create smart, shareable digital cards that can be updated in real-time and shared via QR code or link. This solution reflects our commitment to practical innovation that addresses everyday business needs.

Custom Web Development & E-Commerce

We have delivered responsive websites and online stores for businesses across South Africa, focusing on user experience, conversion optimisation, and brand growth. Our web solutions range from corporate sites to full-featured e-commerce platforms, all optimised for mobile-first African audiences.

MzansiHost – Web Hosting Division

Our in-house hosting brand provides reliable, secure, and affordable hosting services, including shared hosting, VPS, and domain registration. MzansiHost serves as the infrastructure backbone for many of our client solutions, ensuring we maintain full control over the technology stack and can guarantee uptime and performance.

Software Engineering Capabilities

At the heart of Afri iTech is a disciplined software engineering practice. We do not simply write code – we architect solutions that endure. Our engineering capabilities span the complete product lifecycle:

Custom Software Development

Business applications and enterprise systems are our forte. Product development made for web, cloud, and mobile. Our commitment to quality is reflected in our development process, which emphasises agile methodologies, constant communication, and transparency.

Software Architecture

Software architecture is a crucial component of development, and careful consideration of its design and implementation can significantly impact the success of any system. We design for scalability, resilience, and long-term maintainability from day one.

Mobile Applications

We create customised, intuitive, and high-performing mobile apps for your business needs. Whether you are looking to engage with your customers, streamline your operations, or enhance your brand, our mobile app solutions can help you achieve your goals.

Capacity & Resourcing

We complement existing development teams by adding capacity or providing specific high-skilled resources, backed by our senior team members. Whether you need to scale quickly for a project or fill a niche skill gap, we integrate seamlessly.

Our Skills

Software development, Data, AI, ML and analytics, UI/UX design, Automated testing, Digital transformation strategy, Cloud architecture, DevOps, and Design patterns. We stay current with emerging technologies to deliver future-ready solutions.

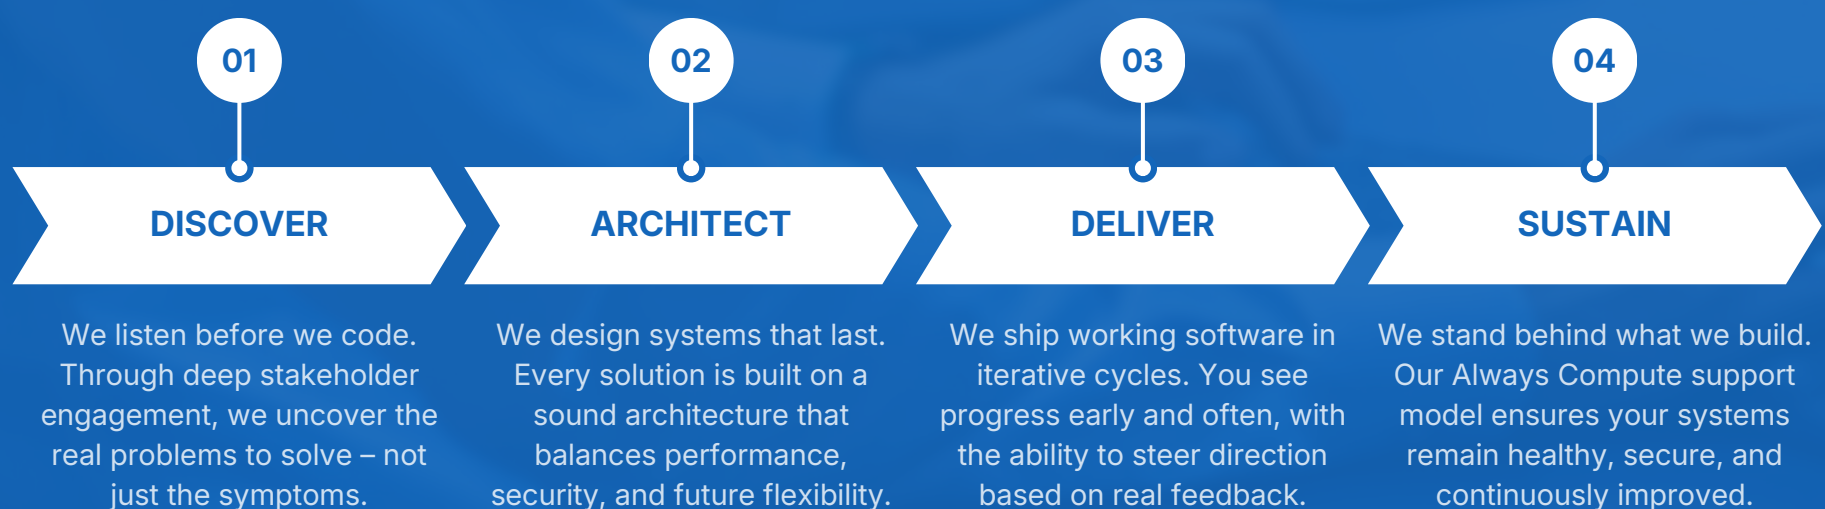

Maintenance & Support (Always Compute)

Peace of mind over the lifetime of your application. We provide ongoing maintenance of source code, deployments, and knowledge base. Enhancements and new features are delivered when required, ensuring your systems evolve with your business.

Our Approach: Build. Ship. Support. Evolve.

We believe that software is never truly finished – it is a living asset that must evolve with your business. That philosophy shapes everything we do:

Core Services

At Afri iTech, we deliver a comprehensive range of IT services designed to empower organisations through transformative technology solutions. From strategy to implementation and ongoing support, we partner with businesses at every stage of their digital journey.

Custom Software Development

Bespoke web applications, mobile solutions, and enterprise systems built to your exact specifications using modern frameworks and cloud-native architecture.

SaaS Platforms

Cloud-based software products including billing systems, management platforms, and sector-specific tools delivered on a subscription basis.

ERP & CRM Integration

Implementation and customisation of enterprise resource planning and customer relationship management systems, with expertise in Odoo and similar platforms.

Managed IT Support

Comprehensive helpdesk services, infrastructure management, hardware support, and proactive maintenance to keep your operations running smoothly.

Cloud Services & Migration

Microsoft 365 and Google Workspace setup, AWS/Azure deployments, and strategic migration from on-premises to cloud infrastructure.

Network & Security

LAN/WAN design, firewall configuration, VPN setup, security assessments, and POPIA compliance guidance.

Business Intelligence

Data analytics, dashboard development, reporting solutions, and insights that drive informed decision-making.

Digital Marketing

SEO strategy, web content development, and online presence management to grow your brand.

Hosting & Domains

Reliable shared hosting, VPS, and domain registration services through our MzansiHost division.

IT Equipment Supply & Procurement

We provide reliable IT equipment sourcing and supply services for organisations of all sizes. Through trusted supplier partnerships, we deliver:

Laptops & Desktop Computers

Servers & Storage Solutions

Printers & Office Equipment

Microsoft & Software Licences

Networking Equipment (Routers, Switches, Firewalls)

Backup & Power Solutions (UPS, Inverters)

We support bulk procurement, branch rollouts, and multi-location deployments across South Africa and SADC.

Our procurement service ensures:

Competitive pricing

Genuine products

Warranty-backed equipment

Installation and configuration support

Why Partner with Afri iTech?

African-Focused Innovation

We understand the local context – the regulatory environment, economic factors, and cultural nuances that shape technology adoption across South Africa and the continent. Our solutions are designed for real-world challenges, not theoretical use cases.

Proven Track Record

Our platforms are already trusted by NGOs, businesses, and religious organisations across the country. From the KZN Blind Society to NPS Management Solutions, we have demonstrated our ability to deliver and support mission-critical systems.

Scalable & Secure Architecture

We build cloud-native systems designed to grow with your organisation. Our architecture ensures you can start with what you need today and expand seamlessly as requirements evolve, all while maintaining enterprise-grade security.

Full-Stack Partnership

From hosting infrastructure through application development to ongoing support – everything under one roof. This integrated approach eliminates finger-pointing between vendors and ensures accountability for results.

Cost-Effective Solutions

Our lean operations and local presence allow us to deliver enterprise-quality solutions at price points accessible to SMEs, NGOs, and growing organisations that larger vendors often overlook.

Long-Term Commitment

We build relationships, not just systems. Our ongoing support for clients like KZN Blind Society and NPS demonstrates our commitment to being a technology partner you can rely on for years to come.

Our Values

Excellence

Delivering high-quality solutions that exceed client expectations.

Integrity

Building trust through transparent communication and honest practices.

Innovation

Embracing emerging technologies to solve real-world problems.

Accessibility

Making enterprise-grade technology available to organisations of all sizes.

Technology Stack

We invest in technologies that deliver results. Our stack is chosen for reliability, scalability, and alignment with industry best practices – giving our clients confidence that their solutions are built on solid foundations.

Category	Technologies
Languages & Frameworks	C#, .NET, TypeScript, JavaScript, HTML5, Dart, Angular
Mobile Development	Flutter (cross-platform iOS & Android), Xamarin
Cloud & DevOps	Microsoft Azure, Azure DevOps, AWS, Docker, Kubernetes, CI/CD Pipelines
Data & Streaming	SQL Server, PostgreSQL, MySQL, MongoDB, Apache Kafka
Source Control & Tooling	GitHub, Azure Repos, CocoaPods, DevExpress
Architecture & Patterns	Microservices, Event-driven, Domain-driven Design, CQRS, Design Patterns
AI & Data Science	Machine Learning, Data Analytics, Automated Testing, Predictive Models
Enterprise Platforms	Odoo ERP/CRM, Microsoft 365, Google Workspace, Power BI

Not Just Developers – Technology Partners

We do not simply deliver projects and walk away. We embed ourselves in your vision, architect solutions that scale, and stand behind every line of code. When you partner with Afri iTech, you gain a team that is as invested in your success as you are.

Get in Touch

We would be pleased to discuss how Afri iTech can support your organisation's technology needs. Whether you require custom software development, IT support, or a complete digital transformation partner, our team is ready to help you achieve your objectives.
